**IPPC – contact points**

Dear contact points,

As you know phytosanitary certificates in Bosnia and Herzegovina are issued by phytosanitary inspectors in the entities and Brcko District BiH.

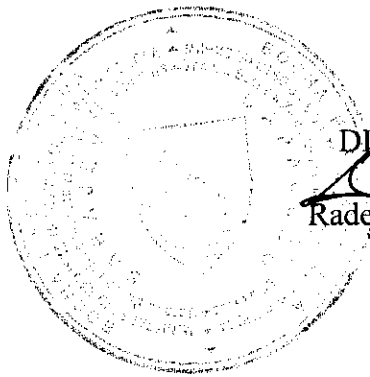

We hereby would like to inform you that the phytosanitary certificates for export and re-export issued by phytosanitary inspectors of Republic Administration for Inspection Republic of Srpska have been changed. Changes apply only to the paper density (weight) and type of paper.

Current phytosanitary certificates are issued on carbon paper which is less weight and as a result it was not possible to print certificates and they had to be filled manually.

Weight and quality of paper for the new phytosanitary certificates is 80 g/m<sup>2</sup> and will be filled electronically and printed. By 31 July 2012 old and new certificates will be issued in parallel. From 01 August 2012. phytosanitary certificates issued by the Republic Administration for Inspection Republic of Srpska will only be at 80 g/m<sup>2</sup> paper. Please note that this is the only change and there are no other changes.

Phytosanitary certificates for export and re-export issued by the Inspectorates of the Federation of BiH and Brcko District BiH are not changed.

Best regards,

DIRECTOR
